## **Project Flow**

## **Project Flow:**

- The user interacts with the UI (User Interface) to upload the image as input
- The uploaded image is analyzed by the model which is integrated
- Once the model analyses the uploaded image, the prediction is showcased on the UI

## To accomplish this, we have to complete all the activities and tasks listed below

- Understanding the data.
  - o Importing the required libraries
  - o Loading the data
  - o Analyzing the data
  - Reshaping the data.
  - Applying One Hot Encoding
- Model Building
  - o Creating the model and adding the input, hidden and output layers to it
  - Compiling the model
  - Training the model
  - o Predicting the result
  - Testing the model by taking image inputs
  - Saving the model
- Application Building
  - o Create an HTML file
  - Build Python Code
